

GMES & Africa - North Africa Consortium Training Program 2021

Topic	Platform	Date
Earth Observation for Monitoring SDG 15.3.1 (Sustainable Development Goal on Land Degradation Neutrality)	MISLAND	13/01/2021
Earth observation for vegetation degradation (long-term vegetation gain/loss trend, change in forest cover, forest fire monitoring)	MISLAND	3/02/2021
Characterization of irrigated areas on the MISBAR platform (Water and agriculture services) using optical data (Sentinel-2)	MISBAR	9/02/2021
Characterization of cultivated areas on the MISBAR platform (Water and Agriculture Services) using radar data (Sentinel-1)	MISBAR	10/02/2021
Contribution of remote sensing for modelling vulnerability to desertification (MEDALUS approach among others)	MISLAND	24/02/2021
Monitoring of the water balance on the MISBAR platform (Water and agriculture services) - Evapotranspiration	MISBAR	3/03/2021
Training on the use of MISLAND platform (latest version)	MISLAND	10/03/2021
Monitoring of agricultural production on the MISBAR platform (Water and agriculture services)	MISBAR	23/03/2021
Presentation of case studies on the MISBAR platform (Water and agriculture services)	MISBAR	24/03/2021
Regional workshop to present the latest version of the MISBAR platform (Water and Agriculture Services) platform and to define the MISBAR management standards for the next decade	MISBAR	25/03/2021
